

Electromagnetic Meter Type FLOW METER

DN3 - 3000

eFlow 900F SERIES

1. Introduction

The **eFlow 900F series** electromagnetic flow meter is a high performance smart meter that features the latest technology. From design structure, manufacturing process, testing & etc are being controlled to ensure product's quality like high accuracy, good performance, wide range and etc. The eFlow 900 will not fail over time as there is no moving parts, therefore, maintenance-free. Furthermore, the technology using electromagnetic field to measure the flow of the medium allows the eFlow 900 to perform well regardless of the quality of liquid.

2. Features

- Accuracy: $\pm 0.5\%$ of flow rate for ($>DN3$)
- Excellent & accurate small flow measurement
- Pipe connection: JIS 10K, JIS 20K, ANSI 150, ANSI 300, DIN PN10, DIN PN16;
- Build-in ground electrode, grounding ring not needed;
- Designed according to PED Directive 97/23 EC
- Double frequency excitation, stable zero point

3. Application

- Waste water management
- Irrigation application
- Flow monitoring
- Industrial system

Electromagnetic flow meter schematic

U_E = Signal Voltage (V)

B = Magnetic Induction (T)

D = Electrode Spacing (m)

V = Average Flow Velocity (m/s)

* Q_v = Volume flowrate (m^3/s)

K = Ratio factor

$U_E \sim B \cdot D \cdot V \cdot K$

$Q_v = (\pi D/4KB) U_{Ei}$

4. Dimensions

External and installing dimension

5. Technical Specification

SPECIFICATIONS - Calculator	
Display	Instantaneous flow alarm display, percentage, velocity, forward and reverse integrated flow and total integrated flow
Blackout data protection	Data will be stored by EEPROM without backup battery
Language	English
Low-frequency square wave exciting	1/16 power frequency, 1/20 power frequency, 1/25 power frequency
High-frequency square wave exciting	½ power power frequency
Exciting current	125mA, 187.5mA, 250mA, 500mA
Speed range	0.1 - 15m/s
Speed resolution	0.5mm/s
Ambient temperature range	-10°C ~ +60°C
Relative humidity	5%~90%
Communication	MODBUS, GPRS, PROFIBUS, HART
Power supply	24VDC, 240VAC
IP rating	IP65, IP68(upon request)
Accuracy	±0.5%, ±0.3
Power rating	< 20W (After connecting sensor)

SPECIFICATIONS - Flange	
Nominal diameter	DN15 ~ DN3000
Nominal Pressure	0.5~4MPa (special pressure can be made upon request)
Accuracy	±0.5%, ±0.3% or ±0.2% are selectable
Liner Material	Teflon, pfa, f46, Neoprene, Poly
Electrode Type	General type, Scraper type and replaceable type
Electrode Material	Stainless stell SU316, Hastelloy C, Titanium, Tantalum Platinum-iridium, etc
Ambient Temperature	-25°C ~ +60°C
Ambient Humidity	5~100%RH (relative humidity)
Measuring Range	1500:1, <15m/s
Structure Type	Integral type, remote type, submersible type, ex-proof type
Protection Class	IP65, IP68(optional)
Ex-proof	Exmd II T4
Production Standard	JB/T 9248-1999 Electromagnetic Flowmeter

6. Order Information

Model Number, Example and Option										Description	
	EI	-900F	- 1 -	DN150	- 1	3	1	2	1		Sample ordering information
Calculator Type	EI										Electromagnetic Integrated Type
	ES										Electromagnetic Separated Type
Series		-900F									Flow meter
Flow Sensor Type			1								Flange Type
Meter Size				DN XXX							Please specify required size
Electrode Material					1						Stainless Steel 316L (V)
					2						Hastelloy C (Hc)
					3						Hastelloy B (Hb)
					4						Titanium (Ti)
					5						Tantalum (Ta)
					6						Tungsten Carbide
					7						Platinum-iridium alloy (Pt)
Liner Material					1						Ne
					2						FEP
					3						PTFE
					4						PU
					5						PFA
Output Interface Option						1					RS485 (Modbus)
						2					RS485 (ASCII)
						2					Active Pulse
						3					Passive Pulse
						4					4-20mA
						5					0-10mA
						7					4-20mA (HART)
						8					Others(Please specify)
Power Supply							1				24V DC
							2				240V AC
							3				220VAC
							4				110VAC
							5				Built-in battery
							6				Others (Please specify)
Ex-proof								0			Without Ex-proof
								1			With Ex-proof
Connection Standard									1		DIN PN10
									2		DIN PN16
									3		DIN PN25
									4		DIN PN40
									A		ANSI 150#
									B		ANSI 300#
									C		ANSI 600#
									D		JIS 10K
									E		JIS 20K
									F		JIS 40K
								G		Others (Please specify)	

Optional Selection	
1	Grounding Ring
2	Matched Flange
3	Entrance Protection Flange
4	Scraper Type Electrode
5	Others

Example:

ES-900F-1-DN50 - 131203 calls for size DN50 electromagnetic flow meter with remote type calculator (Flange connection; Electrode material:Stainless Steel 316L; Liner Material: PTFE; Power Supply: 220V AC; Without Ex-proof; DIN PN25) with RS485(modbus) interface.
